

## Digital Transformation and Open Innovation 2.0

Martin Curley,  
Professor of Innovation,  
Maynooth University

There is a new mode of innovation powered by Digital technologies which blurs the lines between Government, Industry, Academia and citizens. This presentation discusses a perfect storm of disruptive technologies and then shares a set of patterns under the umbrella of open innovation 2.0 which are emerging which can be used to innovate and drive large scale structural change across a community or broad section of society. Several case studies are shared regarding smart city, smart grid and environment transformation.
